

Microwave sterilization equipment

Microwave sterilization equipment. With more than ten years of advanced microwave technology experts and strong technical development team, the company has more than ten years of technical reserve for the research of industrial microwave equipment production technology. It has formed a good cooperative relationship with relevant domestic research institutions, experts and colleges and universities. It is the leading manufacturer of microwave equipment in the domestic industry.

The low temperature baking equipment of microwave Valley hybrid grain is a new type of roasting and curing equipment for grain cereals and curing equipment for grain. Many domestic grain deep processing enterprises are generally using this kind of equipment. Microwave low temperature baking is easy to operate, and it can be operated easily if a person is fed and a person can receive material. The traditional oven, converter baking equipment, the first operation is more complex, second baking time is relatively long. Microwave baking equipment can be applied to the cooked rice, such as soybean, black bean, black rice, black sesame, brown rice and red bean. The ripening time is only 3-8 minutes. In addition, microwave can also play a bactericidal effect in the process of curing the grain, so the daily quality of the grain can be greatly extended. Microwave baking of coarse cereals also has a slight expansion effect.

Ji'nan Tubo Machinery Equipment Co., Ltd. can be used for baking and curing the roasting and curing equipment of five grain hybrid grains. The equipment can be used to dry and kill all kinds of dry fruit / dry goods such as cinnamon, walnut, melon seed, peanuts, jujube, pine nuts, nuts, cashew nuts, wolfberry, nuts, hazelnut, board millet, sunflower seed, lotus seed, preserved fruit and so on. Bacteria, baking, curing treatment, so the equipment also called dry fruit baking machine, dry goods dryer, dry fruit sterilizer and so on, equipment size can be customized according to production, our company can provide prototype technology test, welcome new and old friends to come to visit and negotiate!
